

StratusLab Workshop

mardi 4 septembre 2012 - mercredi 5 septembre 2012

LAL Bat. 200

Programme Scientifique

The meeting start with an open discussion about the overall evolution of the StratusLab software and the priorities for development. This will be followed by discussions about specific services and work on tasks that require collaboration between the developers. Some topics to be discussed (more suggestions welcome!):

Hows the Collaboration? How to people feel about the post-project collaboration? Is there anything we can/should do to improve the collaboration? Do we need to change or update any of the existing collaboration tools?

StratusLab Architecture How to evolve the architecture to become more scalable and efficient. What additional services need to be added to the StratusLab distribution? This will build on previous email discussions.

Software Evolution Evolution of the individual services of the StratusLab distribution. Hot topics are likely to be 1) the migration to a common distributed database, 2) replacing OpenNebula with direct access to libvirt, 3) storage service improvements, ...

Release Management What will the contents of the 13.05 release be? What can be done to improve the testing, certification, and release procedures?

Operations Evolution of the reference infrastructures, management of users, etc.
